The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Lunn, U.S. Patent # 3,641,450.

Fig. 1 of Lunn discloses a circuit comprising: transistor 101 can be read as a first transistor; input at source of transistor 106 can be read as a first input signal; potential B+ can be read as a first potential; load 126 can be read as a first load; ground can be read as a second potential; resistor 130 can be read as a first impedance device; transistor 102 can be read as a second transistor; input at source of transistor 107 can be read as a second input signal; load 127 can be read as a second load; resistor 131 can be read as a second impedance device; circuit having transistors 134, 135, resistor 114 can be read as a variable impedance circuit wherein transistors 134, 135 can be read as a first and second variable impedance devices; resistor 114 can be read as a resistive element; control voltage gain control from collector of transistor 140 can be read as a control voltage.
